

## PUBLICATIONS

- Goyenvalle A, Griffith G, Babbs A, EL Andaloussi S, Ezzat K, Avril A, Dugovic B, Chausseot R, Ferry A, Voit T, Amthor H, Bühr C, Schürch S, Wood MJA, Davies KE, Vaillend C, Leumann C, Garcia L. Functional correction in muscular dystrophic mice using spliceswitching tricyclo-DNA oligomers. **Nature Medicine**. 21(3):270-5, 2015.
- Morice E, Farley S, Poirier R, Dallerac G, Chagneau C, Pannetier S, Hanauer A, Davis S, Vaillend C, Laroche S. Defective synaptic transmission and structure in the dentate gyrus and selective fear memory impairment in the Rsk2 mutant mouse model of Coffin-Lowry syndrome. **Neurobiology of Disease**. 58C:156-168, 2013.
- Vianello S, Yu H, Voisin V, Haddad H, He X, Foutz AS, Sebrié C, Gillet B, Roulot M, Fougerousse F, Perronnet C, Vaillend C, Matecki S, Escolar D, Bossi L, Israël M, De la Porte S. Arginine butyrate: A Therapeutic Candidate for Duchenne Muscular Dystrophy. **FASEB J**, 27(6):2256-69, 2013.
- Perronnet C, Chagneau C, Samson-Desvignes N, Leblanc-Veyrac P, Mornet D, Laroche S, De La Porte S, Vaillend C. Upregulation of brain utrophin does not overcome behavioral alterations in dystrophin-deficient mice. **Human Molecular Genetics**, 21(10):2263-76, 2012.
- Dallerac G, Perronnet C, Chagneau C, Leblanc-Veyrac P, Samson-Desvignes N, Danos O, Peltekian E, Garcia L, Laroche S, Billard JM, Vaillend C. Dystrophin rescue by exon skipping normalizes synaptic plasticity in the hippocampus of the mdx mouse. **Neurobiology of Disease**. 43:635–641, 2011.
- Miranda R, Nudel U, Laroche S, Vaillend C. Altered presynaptic ultrastructure in excitatory hippocampal synapses of mice lacking dystrophins Dp427 or Dp71. **Neurobiology of Disease** 43:134-141, 2011.
- Vaillend C, Perronnet C, Ros C, Gruszczynski C, Goyenvalle A, Laroche S, Danos O, Garcia L, Peltekian E. Rescue of a dystrophin-like protein by exon skipping in vivo restores GABA<sub>A</sub>-receptor clustering in the hippocampus of the mdx mouse. **Molecular therapy** 18(9):1683-8, 2010.
- Perronnet C, Vaillend C. Dystrophins, utrophins and associated scaffolding complexes: Role in mammalian brain and implications for therapeutic strategies. **Journal of Biomedicine and Biotechnology** 2010:849426, 2010.
- Daoud F, Candelario-Martínez A, Billard J-M, Avital A, Khelifaoui M, Rozenvald Y, Guegan M, Mornet D, Jaillard D, Nudel U, Chelly J, Martínez-Rojas D, Laroche S, Yaffe D, Vaillend C. The role of the dystrophin-gene product Dp71 in excitatory synapse organization, glutamatergic transmission, synaptic plasticity, and selective behavioral functions. **PLoS ONE**, 4(8) :e6574, 2009.
- Miranda R, Sébrié C, Degrouard J, Gillet B, Jaillard D, Laroche S, & Vaillend C. Reorganization of inhibitory synapses and increased PSD length of perforated-excitatory synapses in hippocampal area CA1 of dystrophin-deficient mdx mice. **Cerebral Cortex** 19(4):876-88, 2009.
- Vaillend C, Poirier R, & Laroche S. Genes, Plasticity and Mental Retardation. **Behavioural Brain Research** 192(1):88-105, 2008.
- Poirier R, Jacquot C, Vaillend C, Southiphong A-A, Libbey M, Davis S, Laroche S, Hanauer A, Welzl H, Lipp H-P, & Wolfer DP. Deletion of the Coffin-Lowry syndrome gene Rsk2 in mice is associated with impaired spatial learning and reduced control of exploratory behavior. **Behavior Genetics** 37(1):31-50, 2007.
- Vaillend C., Billard, J.-M. & Laroche S. Impaired long-term spatial and recognition memory and enhanced CA1 hippocampal LTP in the dystrophin-deficient *mdx* mouse. **Neurobiology of Disease** 17(1), 10-20, 2004.
- Vaillend, C. & Billard, J.M. Facilitated CA1 hippocampal synaptic plasticity in dystrophin-deficient mice: Role for GABA<sub>A</sub> receptors ? **Hippocampus** 12(6) : 713-717, 2002.
- Vaillend, C., Mason, S.E., Cuttle, M.F. & Alger, B.E. Mechanisms of neuronal hyperexcitability caused by partial inhibition of Na<sup>+</sup>-K<sup>+</sup>-ATPases in the rat CA1 hippocampal region. **Journal of Neurophysiology** 88(6) : 2963-78, 2002.
- Vaillend, C., Rampon, C., Davis, S., & Laroche, S. Gene control of synaptic plasticity and memory formation : Implications for diseases and therapeutic strategies. **Current Molecular Medicine** 2(7): 485-505, 2002.
